PSU IEEE ESCAPE ROOM

SOFTWARE BRANCH – PART1 [PYTHON GUI]

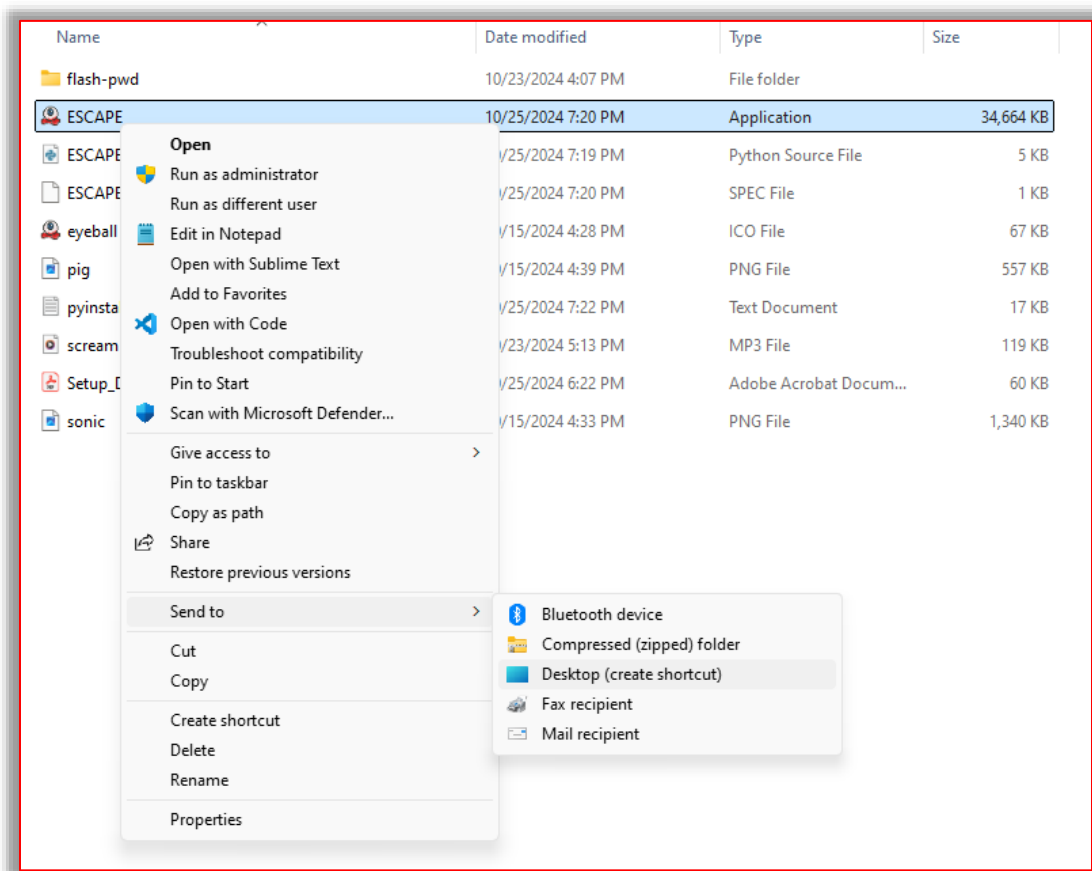

Setup Instructions:

The .zip file should contain the contents shown in the image.

Shift + Right-click on the .exe file [Python App] and select Send to > Desktop (create shortcut).

Using Arduino, flash three DigiSparks (one for each room) with the included "flash-pwd" INO file.

Passwords:

Entry password to unlock app (access token) is cmpenis#1 ("cmpen is number one"). This is entered via DigiSpark.

Binary Translation is IEEEsaysHI (case-sensitive, no spaces).

Final exit password is CursedByFentanyl (needed for Part1).
